

PP150-M Factsheet

Applicable Welding Methods	PLASMA Powder PLASMA Coating
Automation	Manual
AC / DC	DC
Current DC	150 A
Availability	Standard

SBI GmbH - Gewerbering 15 - A-3710 Ziersdorf

Phone: +43/29 52/341 39 Fax: +43/29 52/341 39-800 Mail: office@sbi.at

About SBI GmbH

SBI was founded in 1999 with the aim of developing rapid prototyping technologies. SBI has therefore developed its plasma technologies and built welding solutions. From automated solutions for coating technologies to the repair of forging dies or plasma arc deposition machines for the maintenance of aircraft turbines, SBI has established world-renowned references in the field of arc deposition plasma. Since 2009, SBI has established itself as the main supplier of its plasma-based technology for the 3D manufacturing of aeronautical parts.

Besides its renown portfolio of superior plasma invertor systems and plasma welding equipment, SBI has been developing its own additive manufacturing machines. The manufacturer put the metal additive manufacturing system M3DP on the market in 2019.
