

# PP400-R Factsheet

The PP400-R is our special torch for Additive Manufacturing applications using powder feeding.

<b>Applicable Welding Methods</b>	<ul style="list-style-type: none"><li>• PLASMA Powder</li><li>• PLASMA Coating</li></ul>
<b>Automation</b>	Automated
<b>AC / DC</b>	AC/DC
<b>Current DC</b>	400 A
<b>Availability</b>	Standard

## About SBI GmbH

SBI was founded in 1999 with the aim of developing rapid prototyping technologies. SBI has therefore developed its plasma technologies and built welding solutions. From automated solutions for coating technologies to the repair of forging dies or plasma arc deposition machines for the maintenance of aircraft turbines, SBI has established world-renowned references in the field of arc deposition plasma. Since 2009, SBI has established itself as the main supplier of its plasma-based technology for the 3D manufacturing of aeronautical parts.

Besides its renown portfolio of superior plasma inverter systems and plasma welding equipment, SBI has been developing its own additive manufacturing machines. The manufacturer put the metal additive manufacturing system M3DP on the market in 2019.
